

A Great Opportunity To Grow Your Career With The Leading Global Technology Consultancy For The Investment Management Sector

For almost twenty years Axxsys Consulting has provided specialized Management and Technology consultancy to the global investment management community. As part of the Alpha FMC family, Axxsys has the backing of one of the industries most respected Management Consultants and is pursuing aggressive growth in North America.

Five Compelling Reasons To Work At Axxsys Consulting

1. Work with the best

Axxsys' clients are the largest and most complex asset managers and asset owners engaging in large scale transformation projects so you will be doing interesting and meaningful work. Axxsys targets successful and experienced consultants which means you will join a dynamic team that will challenge you and push you to succeed.

2. Variety is the spice of life - different projects across multiple technologies

Axxsys has multiple projects running at any point of time. These may be developing strategies, target operating model reviews, implementing major change programs, cloud transformations or managing operational support services. Axxsys is an expert at working with multiple vendors, examples include Charles River®, Blackrock Aladdin, SimCorp®, Investcloud, Snowflake and Markit EDM. You will have the opportunity to learn multiple platforms, expand your skillset and knowledge base, providing you with new challenges. Here are some examples of the scale of projects you could be involved in:

Implementation of a Global Single Operating Model

A global financial services firm managing over EUR 500 billion of assets wanted a single global operating model integrated into the existing business with a simplified technology and operational environment that would facilitate sustained growth, at the same time build a strategic operating model that will manage cost, risk and resources. You can find out more [here](#).

Business Acquisition, Migration & Transformation

One of the largest asset managers in the Nordics with EUR 80 billion assets under management needed to migrate a newly acquired large pensions business onto an existing SimCorp Dimension® platform with a series of complex projects covering many areas of the investment operations business. The migration and business transformation needed to be completed within 5 months. You can find more details [here](#).

Business Optimisation Review of Reporting Solutions

A US based global asset manager with \$2 trillion assets under management needed a thorough review and overhaul of their reporting operation and platform. They were facing many challenges with production and distribution of Fund Fact Sheets and Pitch Books due to overly complex rules and conditions for templates, large amounts of manual processing, system performance was poor and there was an over reliance on the client reporting vendor. Read the case study [here](#).

3. Be a Hero!

Axxsys is an independent and trusted advisor to its clients and as such Axxsys consultants are highly valued and respected within the client organization. Our consultants work on high-profile projects engaging at the highest levels of our client organizations, influencing the vision and strategy for some of the largest asset management firms in the world. Additionally, many times our consultants are brought in to save the day on high-profile projects that are underway but not going as planned.

4. Excellent work-life balance

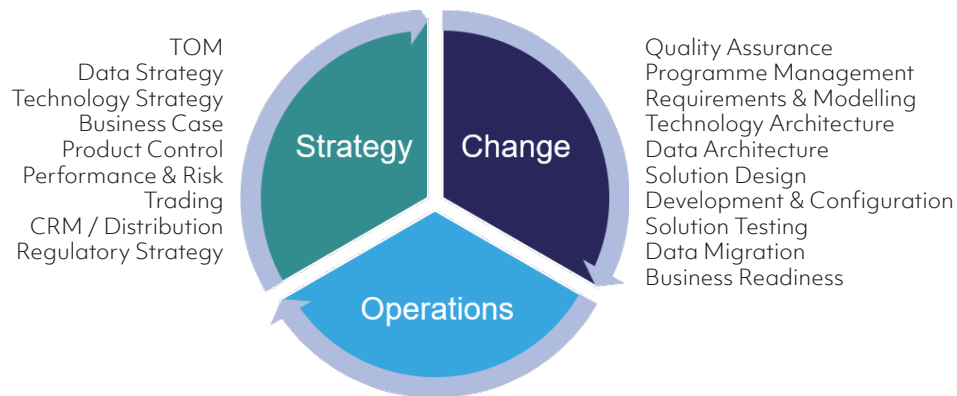

Axxsys encourages a healthy work-life balance, including supporting remote working with office space available in major cities if you want it. On-site time with clients if desired by the client will be managed to ensure unnecessary travel is avoided. We also offer twenty-five vacation days per year plus standard holidays. More importantly, we encourage our employees to use their vacation time. Time away to recharge keeps our team sharp and effective so it is a priority at Axxsys.

5. Career Advancement

North America is the growth engine for our business and as such there is significant room for career development, whether your interests lie in management or business development or a bit of both. Meeting our growth targets demands scale and we strongly believe in promoting from within so you will have ample opportunity to take on more responsibilities.

Axxsys Academy

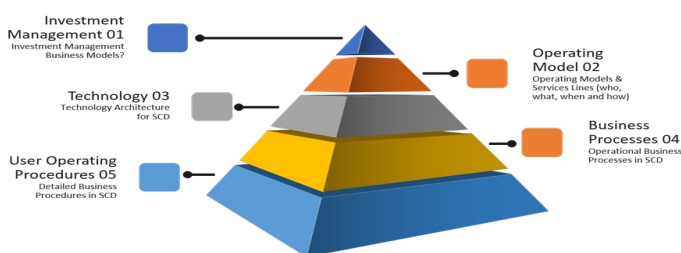

At Axxsys Consulting we pride ourselves in attracting and retaining only the best people in our market. Consultants want to join Axxsys to be part of a highly skilled, knowledgeable and respected team in the asset management industry. Our consultants have extensive experience in the sector and a comprehensive understanding of the technology platforms used.

To ensure our team are kept up to date with the latest industry trends, new regulation and best practices we introduced the **Axxsys Academy**. The Academy ensures consultants are aware of the latest technology developments and solutions in the market.

The Academy includes a detailed induction programme for new consultants that covers core consultancy skills. Part of the onboarding incorporates building knowledge of the **Axxelerator™ Platform** and the Axxelerator modules that have been created.

We believe in investing in our team, furthering their education and knowledge that is not only good for the consultants, but good for our clients as they can rest assured they are working with the most highly skilled specialists in the market.

A typical Academy model for SimCorp Dimension®:

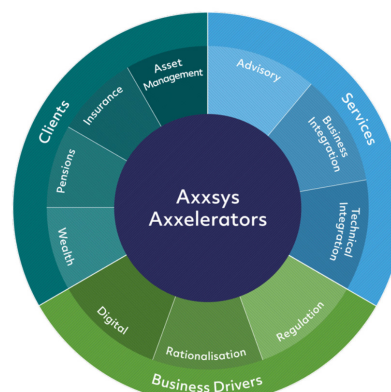

Axxsys Axxelerator™ Platform

Our team of highly skilled and experienced consultants understand the investment management industry with particular focus on technology solutions and their respective vendors.

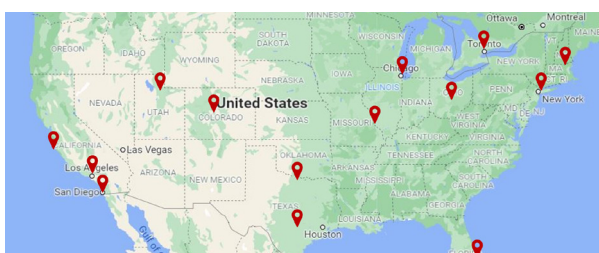

We've harnessed this knowledge to develop the **Axxsys Axxelerator™ Platform**, a unique offering in the market that truly sets Axxsys apart. Axxsys Axxelerators™ offer clients "pre-packaged" (70/30) modules designed to fast-track the development of Target Operating Models, Business Processes & Analysis, Standard Technology Package Implementations and Project Delivery Frameworks.

For each service, a pre-defined model is developed, built around an appropriate selection of **Axxsys Axxelerators™**, such as engagement guidelines, best practices, templates, working examples, plans and service specific tools, all designed to ensure major transformation programmes are fit for the business, not the software.
